CERVO Mountain Boutique Resort: facts and figures

The view alone of the Matterhorn is simply sensational. The scenic location between the edge of the forest and the outskirts of the village is unique and radiates rest and relaxation. The new hotel consists of eight chalets with spacious rooms and suites. All contain a private wellness room for the exclusive use of hotel guests in their respective chalets. All chalets are easily accessible by lift and a footpath. The distinctive design creates a balance between Alpine chalet, mountain hut and hunting lodge, with just the right amount of modernity. And the architecture incorporates the special characteristics of this unique setting on the edge of the forest. The CERVO is the creation of the MLS architectural bureau in Zermatt under the direction of Roman Mooser and interior designer Roger Bächtold with his P.5 team from Zurich.

In December 2009, Seraina and Daniel F. Lauber celebrated becoming hosts of their own hotel and restaurant in a dream location with view of the Matterhorn. Already in the first year the CERVO got people talking. Satisfied guests praised the stylish and fashionable hotel on tripadvisor.com. It is this year when the CERVO wins Tripadvisor's Travellers' Choice Award again.
